

Store-Trac

Store-Trac allows your team access to your storage control systems from tablets, mobile devices and desktops. Quickly evaluate storage settings and conditions from any location.

Lab-Trac

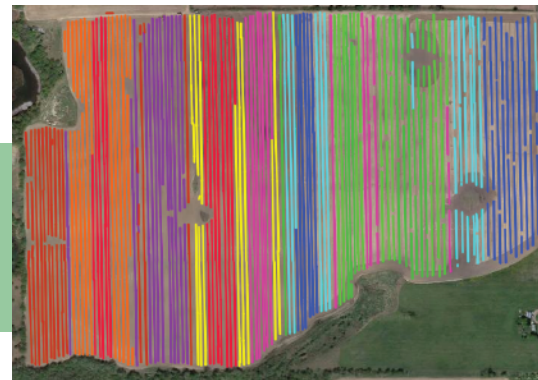

Techmark's laboratory services offer sugar analysis and process quality evaluation for your storage crop. Consulting services work with you to create the best management plan for your potato storage ventilation system.

T-Solutions : Storage system innovation through integration of technology and experience

Bruise-Trac

Your bruise data organized into an accessible database. Bruise information collected from your grading lines is organized and reported to your team.

Qual-Trac

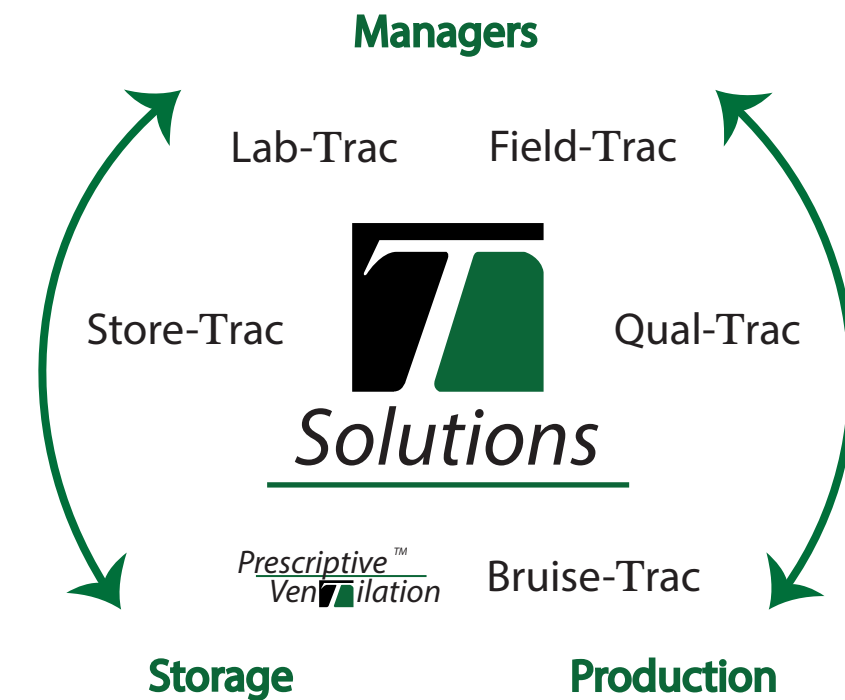

Track your crop from the field into the storage.

Field-Trac

Store your chemical application records, issue work orders to spray applicators and efficiently track chemical usage by field or farm.

T-Solutions is a portfolio of products and services that allow your team to manage important data related to the storage quality of your crop

T-Solutions create an online community for your data. Traceable and accessible. Data becomes useful as your team is able to access it and turn it into responses to your storage conditions. T-Solutions was developed in response to growers needs and designed with grower input.
