

Stor-Trac PC and Network Requirements

Overview

This provides the specifications for running Stor-Trac as of 03/03/17.

PC Specifications

CPU:

- 64-Bit Quad-core, 2.0 GHz, with Virtualization Technology.
- Example: Intel Core i5 (which includes VT-x) technology or better
- Note: Virtualization technology must be enabled in the BIOS of the PC

RAM:

- 8 GB Ram or better
- 16GB Recommended for majority local network access (StorTrac Local)

Hard Disk:

- 40 GB free hard disk space or better
- Note: Solid-State hard drive recommended due to enhanced performance

Operating System:

- Windows 10, 8.1, or 7, must be 64-bit
- Note: Windows 10 Pro recommended

USB:

- 2 USB ports required - 1 for communication to a GreenLink Box, 1 for the software security dongle.
- Note: 1 extra USB port recommended allowing the installation thumb drive to be used for external backups

Remote / Cloud Connectivity:

- Internet Access: 2 Mbps broadband connection or faster
- Reliability: Continuous connection with minimal disruptions or down-time.
- Static IP address: Not required.
- Public IP address: Not required.
- Networking Router or Firewall: Internet access to the Stor-Trac PC must not be blocked.
- Note: Detailed networking requirements available upon request if your system is behind a corporate firewall or content filter.
