Air Flow Testing Kit

Do you know what your Real Air Flow is? Or are you guessing...

Our Air Flow Testing Kit includes everything needed to confirm the air flow in your storage facility. The extended allows you to place the anemometer into a tube without impeding the flow of air and affecting the measurement. The only way to know that your crop is getting the correct air is to test the different zones in your air flow. If you've made changes to your air system, ventilation controllers or structure it is important to confirm that proper air flow is correct after the changes. The kit comes in two small cases and is very portable.

Techmark Part Number: 050068
Price: \$617.34
