CO2 Retrofit Kit for Mushrooms

NEW !

Our new CO2 sensor assembly for mushrooms is an improvement over our GMD20 series. This is a plug and play replacement for your current CO2 sensor and attaches easily to your PVC RH canister. Our new sensor has greater resolution, longer time periods between calibrations and is lower cost. The IP 65 connection has a higher resistance to H2O penetration including direct spray. This unit is lower profile and a better fit between your shelves. If replacing a current sensor or installing a new one this upgraded CO2 sensor assembly is your best choice.

For more information or to order a CO2 retrofit, contact Techmark at 517-322-0250 or email us at techmark@techmark-inc.com.

Part Number: 050518
ASSY, Sensor, CO2 Mushroom Retrofit
