Aluminum RH Canister

Our aluminum RH canister is compact, durable and easy to remove with a lift off fan assembly. The aluminum casing and reservoir are virtually indestructible. The new CO2 analyzer is plug and play making it easy to work with. Our aluminum RH canister is more compact than the previous model allowing it to fit between shelves while leaving more space. For trays there is an additional hanging kit available.

The new CO2 Sensor is durable and easily replaced when needed. The sensor is unaffected by water spray and requires no additional shielding like the previous model. Along with the entire RH canister, this sensor is lower profile making it a better fit between shelves or wherever space is an issue.

We've designed a swing hinge that allows the unit to be swung out of the way when work is needed on the beds. The hinge is also a pop-off design which allows service to be easily completed by simply lifting and removing the unit. This design is all about making day to day activities more efficient.

The RH canister comes with reservoir and all parts necessary for installation. For questions and inquiries please call 517-322-0250 or send email to techmark@techmark-inc.com

To order call Techmark at 517-322-0250 and use Part number: 050524. Price per unit is \$1,184.75
